

Claims 1-28 (canceled)

- 29 -

(withdrawn) The use of a membrane fraction of Gram-negative bacteria, comprising proteoglycans, for preparing a pharmaceutical composition which is immunostimulant and/or which is capable of inducing an antitumor immune response.

- 30 -

(withdrawn) The use of Claim 29, wherein the membrane fraction comprises a membrane fraction of *Klebsiella pneumoniae*.

- 31 -

(withdrawn) The use of Claim 29, wherein the membrane fraction comprises membrane fractions of at least two different strains of bacteria.

- 32 -

(withdrawn) The use of Claim 29, wherein preparation of the membrane fraction comprises the following steps:

- a) culturing the bacteria in a culture medium which allows their growth, followed by centrifugation of the culture;
- b) where appropriate, deactivation of the lytic enzymes of the bacterial pellet obtained in step a), then centrifugation of the suspension obtained;
- extraction and elimination of the non-membrane-bound proteins and of the nucleic acids of the pellet obtained in step a) or b) with at least one cycle of washing the pellet in an extraction solution;
- digestion of the membrane pellet obtained in step c) in the presence of protease enzymes, followed by centrifugation;
- e) at least one cycle of washing the pellet obtained in step d) in a physiological solution and/or in distilled water; and

1

f) ultrasonication of the pellet obtained in step e).

(withdrawn) The use of Claim 29, wherein preparation of the membrane fraction comprises the following steps:

- a) culturing of the bacteria in a culture medium which allows their growth followed, where appropriate, by centrifugation;
- b) freezing of the culture medium or of the pellet obtained in step a), followed by thawing and drying of the cells;
- c) elimination, using a DNase, of the nucleic acids from the dried cells obtained in step b), which have been resuspended;
- d) grinding of the cells obtained in step c) and clarification of the suspension obtained;
- e) precipitation, in acid medium, of the suspension obtained in step d) and elimination of the pellet;
- f) neutralization of the supernatant obtained in step e) containing the membrane suspension, followed by dialysis and concentration of the membrane suspension; and
- g) sterilization of the concentrated membrane suspension obtained in step f).

- 34 -

(withdrawn) The use of Claim 29, wherein the pharmaceutical composition also comprises a vehicle agent for the membrane fraction in a form which makes it possible to improve its stability and/or its immunostimulant activity and/or its capacity to induce an antitumor immune response.

- 35 -

(withdrawn) The use of Claim 34, wherein the agent is of the oil-in-water or water-in-oil emulsion type.

(withdrawn) The use of Claim 34, wherein the agent is in the form of a particle of the liposome, microsphere or nanosphere type, or any type of structure which enables said membrane fraction to be encapsulated and presented in particulate form.

- 37 -

(withdrawn) The use of Claim 29, wherein the pharmaceutical composition also comprises an agent for potentiating the immunostimulant activity and/or the antitumor immune response of said membrane fractions.

- 38 -

(withdrawn) The use of Claim 37, wherein the agent for potentiating the immunostimulant activity and/or the antitumor immune response of said membrane fractions is a cytokine.

- 39 -

(withdrawn) The use of Claim 37, wherein the agent for potentiating the immunostimulant activity and/or the antitumor immune response of said membrane fractions is a regulatory agent chosen from hormones.

- 40 -

(withdrawn) The use of Claim 37, wherein the agent for potentiating the immunostimulant activity and/or the antitumor immune response of said membrane fractions is a regulatory agent chosen from growth factors.

- 41 -

(withdrawn) The use of Claim 37, wherein the agent for potentiating the immunostimulant activity and/or the antitumor immune response of said membrane fractions is a cellular compound.

(withdrawn) The use of Claim 41, wherein the cellular compound is a nucleic acid chosen from DNAs and RNAs.

- 43 -

(withdrawn) The use of Claim 41, wherein the cellular compound is a compound of the ribosome family.

- 44 -

(withdrawn) The use of Claim 41, wherein the cellular compound is a protein of the heat-shock protein family.

- 45 -

(previously presented) A method of stimulating an immune response and/or inducing an antitumor immune response in a mammal, including a human, in need thereof whereby a membrane fraction of Gram-negative bacteria, comprising proteoglycans, is administered in the form of a pharmaceutical composition in combination with an anticancer treatment in an amount effective to result in such induction and or stimulation.

- 46 -

(previously presented) The method of Claim 45, wherein the anticancer treatment is chemotherapy and/or radiotherapy.

- 47 -

(previously presented) The method of Claim 45, wherein the pharmaceutical composition is administered simultaneously with, separately from, or at intervals with, the anticancer treatment.

(previously presented) The method of Claim 47, wherein the pharmaceutical composition is administered enterally or parenterally.

- 49 -

(previously presented) The method of Claim 45, wherein the combined anticancer treatment is a chemotherapeutic treatment comprising a protease inhibitor or a compound with anti-angiogenic activity.

- 50 -

(currently amended) The method of Claim 45, for preventing and/or treating cancers.

- 51 -

(currently amended) The method of Claim 50, for preventing and/or treating bladder cancers, prostate cancers, colon cancers, liver cancers and malignant melanomas.

- 52 -

(withdrawn) A pharmaceutical composition comprising a membrane fraction of Gram-negative bacteria, comprising proteoglycans, which can be obtained using a method for preparing a membrane fraction of Claim 32.

- 53 -

(withdrawn) A pharmaceutical composition comprising a membrane fraction of Gram-negative bacteria, comprising proteoglycans, which can be obtained using a method for preparing a membrane fraction of Claim 33.

- 54 -

(withdrawn) The pharmaceutical composition of Claim 52, wherein the Gramnegative bacterium is *Klebsiella pneumoniae*.

(withdrawn) The pharmaceutical composition of Claim 53, wherein the Gramnegative bacterium is *Klebsiella pneumoniae*.

- 56 -

(currently amended) A pharmaceutical composition comprising a membrane fraction of Gram-negative bacteria, comprising proteoglycans, for administration administered in combination with an anticancer treatment in an amount effective to stimulate an immune response and/or induce an antitumor immune response in a mammal, including a human, in need thereof.

- 57 -

(previously presented) The pharmaceutical composition of Claim 56, which is combined with an anticancer treatment by chemotherapy and/or by radiotherapy.

- 58 -

(previously presented) The pharmaceutical composition of Claim 57, which contains an anticancer compound as a combination product for use which is simultaneous, separate, or at intervals.

- 59 -

(canceled)

- 60 -

(withdrawn) The pharmaceutical composition of Claim 58, wherein the anticancer compound is chosen from protease inhibitors or from compounds with antiangiogenic activity.

(withdrawn) The pharmaceutical composition of Claim 59, wherein the anticancer compound is chosen from protease inhibitors or from compounds with anti-angiogenic activity.

- 62 -

(previously presented) The method of Claim 45, wherein the Gram-negative bacterium is *Klebsiella pneumoniae*.

- 63 -

(previously presented) The pharmaceutical composition of Claim 57, wherein the chemotherapy is chosen from protease inhibitors or from compounds with antiangiogenic activity.

- 64 -

(previously presented) The pharmaceutical composition of Claim 56, wherein the Gram-negative bacterium is *Klebsiella pneumoniae*.
